

# Input by Spartacists

For the Conference to initiate an anti-imperialist united front. This united front is not based on agreement on all ideological questions or on participants sacrificing their political independence. It is based on agreement to mobilise for common struggle in defence against the right-wing GNU onslaught (“March separately, strike together!”). As an initial programme of action, the Conference adopts the following demands:

1. Defend the left against state repression! Hands off Julius Malema and the EFF—overturn the racist sentence and conviction! Scrap the PIE Act Amendments Bill! An injury to one is an injury to all!
2. Defend unions against strike-breaking attacks! Defend SAMWU’s wage deal against Godongwana’s blackmail! Scrap the LRA Amendments Bill, fight the jobs bloodbath! Fight to rip up GNU austerity and repudiate the debt to the imperialist bloodsuckers! For a public works programme to fix infrastructure, build affordable housing and tackle unemployment!
3. Defend immigrants against pogromist attacks! Mobilise to stop March & March and Dudula! To undercut the African-hating, tribalist demagogues and bridge the divide between foreign and South African workers, we must link this to a fight to defend and expand everyone’s access to health care, education and jobs. Nationalise private hospitals and schools! For swift and radical implementation of NHI! Fight to organise immigrant workers, casualised and other unorganised workers into the trade unions!
4. Defend South Africa against US Imperialism! Expel Brent Bozell III, close the Israeli embassy, and recall Roelf Meyer! Block all coal exports to Israel! Cancel all critical mineral supplies to the Pentagon War Machine! Down with US tariffs!
